

ADHI KRISHNA S

Flutter Developer | Firebase | Api / Ai

Vadakara, Kozhikode • +91 7907748057 • adhi62103@gmail.com • [LinkedIn](#) • [Portfolio](#) • [Git Hub](#)

Flutter Developer with hands-on experience in building cross-platform mobile apps using **Flutter**, **Dart**, **Firebase**, and **REST APIs**. Skilled in **responsive UI design**, **Provider state management**, and **clean architecture**. Completed multiple real-world projects and currently gaining **industry experience** through **internship**. Passionate about learning new technologies and building scalable mobile applications for **Android** and **iOS** while actively enhancing skills to secure a full-time Flutter developer role.

WORK EXPERIENCE

Flutter Developer-Intern

October - 2025 - Present

Acadeno Technologies - Kozhikode, Kerala

- **Flutter Developer** with hands-on experience in building **cross-platform mobile applications** using **Flutter** and **Dart**, focusing on creating **robust**, **scalable**, and **user-friendly** solutions by following modern **UI/UX principles** and **clean architecture**. Experienced in integrating **REST APIs** and backend services including **Firebase Authentication** and **Firestore** to deliver **secure**, **dynamic**, and **real-time application features**.
 - Skilled in implementing efficient **state management** using **Provider** to improve application **performance**, **maintainability**, and **scalability**. Developed multiple real-world projects such as **Netflix clone**, **Recipe API integration** app, **e-commerce cart** with **Multi-Provider**, **student directory CRUD** app, and **Firebase-based registration systems**. Proficient in building reusable widgets, **responsive UI layouts**, and essential features like **authentication**, form **validation**, **image picker**, and **API integration**.
 - Actively using **GitHub** for **version control** and project management, maintaining clean, structured, and readable code. Currently gaining industry exposure through internship experience at Acadeno Technologies while continuously enhancing **Flutter development**, **problem-solving**, and **software development** skills.
 - Passionate about learning new technologies and building **high-quality**, **scalable** mobile applications while seeking an opportunity to grow as a professional **Flutter Developer** in a dynamic organization.
-

PROJECTS

WHATSAPP UI (ANDROID AND IOS)

Tech Stack: Flutter, Dart, Material UI, Git, GitHub

- Developed a WhatsApp-inspired cross-platform UI application using Flutter with multiple screens such as Chats, Calls, and Communities.
- Designed clean, responsive, and user-friendly interfaces using Material widgets, ensuring consistency across different screen sizes and devices.
- Built reusable components like chat tiles, call logs, avatars, and action buttons to maintain structured and scalable UI design.
- Used Git and GitHub for version control to manage code updates, track changes, and maintain organized project development.

Code: https://github.com/adhi62103-maker/whatsapp_ui

QUIZE APP

Tech Stack: Flutter, Dart, Material UI, Git, GitHub

- Developed a Quiz application using Flutter with multiple screens and interactive UI.
- Implemented question navigation, answer selection, and real-time score calculation.
- Designed responsive and user-friendly interfaces using Material widgets.
- Applied Flutter navigation and basic state management for smooth performance.
- Followed clean UI structure and modern mobile app design standards.

Code: <https://github.com/adhi62103-maker/QuizeTime>

ONLINE STORE(MVC FORMATE)

Tech Stack: Flutter, Dart, Provider (MultiProvider), MVC Architecture, Material UI

- Developed an E-commerce cart app using Flutter with MVC architecture and MultiProvider state management.
- Implemented product listing, cart management, and total price calculation.
- Designed responsive UI using Material widgets and reusable components.
- Ensured clean code structure and smooth app performance

Code: https://github.com/adhi62103-maker/mvc_e_commerce_cart_multiprovider

NETFLIX-STYLE UI APP

Tech Stack: Flutter, Dart, Material UI, Flutter Navigation, Responsive UI Design

- Developed a Netflix-inspired UI clone using Flutter with multiple screens and modern layout design.
- Implemented responsive UI, reusable widgets, and smooth navigation between screens.
- Designed movie listing interface with clean layout, banners, and thumbnails.
- Customized themes, colors, and typography to match real-world OTT app design.
- Focused on clean code structure and user-friendly mobile UI experience.

Code: https://github.com/adhi62103-maker/netflix_clone

NOTE APP

Tech Stack: Flutter, Dart, CRUD Operations, Provider/State Management, Material UI, Local Storage

- Developed a Student Directory & Notes app using Flutter with full CRUD functionality.
- Implemented add, edit, delete, and view features for managing student records and notes.
- Used structured state management and navigation for smooth data handling.
- Designed responsive and clean UI using Material widgets.
- Focused on organized code structure and user-friendly app experience.

Code: https://github.com/adhi62103-maker/student_directory_noteapp_curd

REGISTRATION APP

Tech Stack: Flutter, Dart, Firebase Authentication, Cloud Firestore, Material UI, REST/API Integration

- Developed a Registration app using Flutter with Firebase Authentication and Firestore integration.
- Implemented user sign up, login, validation, and real-time database storage.
- Designed clean and responsive UI using Material widgets.
- Integrated Firebase for secure authentication and backend data management.
- Focused on smooth navigation and user-friendly app experience.

Code: https://github.com/adhi62103-maker/registration_app_flutter_firebase

RECIPE APP

Tech Stack: Flutter, Dart, REST API, HTTP, JSON Parsing, Material UI, Flutter Navigation

- Developed a Recipe app using Flutter with REST API integration for dynamic data fetching.
- Implemented recipe listing, search functionality, and detailed view screens.
- Used HTTP/API integration to fetch and display real-time recipe data.
- Designed responsive and clean UI using Material widgets.
- Ensured smooth navigation and user-friendly mobile experience.

Code: https://github.com/adhi62103-maker/recipes_api_integration

RECIPE APP

Tech Stack: Flutter, Dart, REST API, AI API Integration, HTTP, JSON Parsing, Material UI

- Developed an AI Chatbot app using Flutter with real-time conversational UI.
- Integrated AI API to generate responses and handle user queries dynamically.
- Designed clean chat interface with message bubbles and smooth navigation.
- Implemented API handling, JSON parsing, and state updates for chat flow.
- Focused on responsive UI and modern chat application design.

Code: https://github.com/adhi62103-maker/flutter_ai_chat_bot

TECHNICAL SKILLS

- **Languages:** Dart
 - **Framework:** Flutter
 - **UI:** Material UI (Flutter Material Widgets)
 - **State Management:** Provider
 - **Backend:** Firebase, REST API
 - **Tools & Libraries:** Android Studio, VS Code, GitHub, Git, AI Agents and prompting skills
 - **Others:** Responsive Design, API Integration, Authentication
-

SOFT SKILLS

- Quick Learner
 - Problem Solving
 - Self-Motivated
 - Team Collaboration
 - Time Management
 - Adaptability
-

EDUCATION

- **Bachelor of Computer Applications (BCA)**

IGNOU - 2024 to present

- **Bachelor of Computer Applications (BCA)**

Kerala State Board - 2022 to 2024

LANGUAGES

- English
- Malayalam
